

How did we get here?

Well, time has a way of aging all things.

Our dining hall, kitchen, and Boeing Bunkhouse roofs are between 25 and 35 years old. Unfortunately, these roofs are leaking and creating more maintenance issues due to the excess water. Our program highlight Cowboy Action Range had a tree fall on it. While usable this summer all of these structures need to be fixed before the fall brings the Pacific Northwest's signature rain.

Fire Mountain Scout Camp

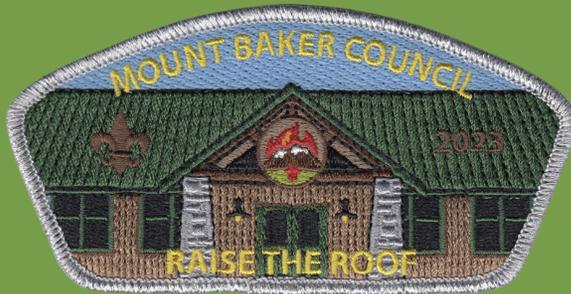

Raise the Roof Campaign

Hollander Hall - Camp Kitchen and Dining Hall

Arguably one of the most significant and well used parts of camp, especially during inclement weather.

Another chance for you to leave a lasting legacy for the future of Fire Mountain and to positively impact the youth in our communities for years to come.

Our Goal \$230,000

Thanks to judicious planning and generous planned giving, we have already raised over \$220,000. We are looking to you to help fund the balance. Two generous anonymous donors have put our goal well within reach. Help us hit the peak!

Cowboy Action Range

If a tree falls in the forest and no one hears it, does it really damage the Cowboy Action Range roof? Black Powder, Axe Throwing, and Slingshot - practically screams a good time for Scouts. Help restore this program highlight area to its former glory.

Ways to Help

Thank you for consideration of our cause. The Mount Baker Council and the Boy Scouts of America have been offering life changing programs for over 110 years. Your contribution helps us to continue our mission of positively impacting youth.

Boeing Bunkhouse

A favorite area for Scouting units, training, and families. The Bunkhouse has plenty of happy memories to make...if it gets a new roof.
